

## 18.

### Report of the Hospital and Laboratory of the New York Zoological Park, 1939. Mortality Statistics of the Society's Collection.

LEONARD J. GOSS  
*Veterinarian.*

During the year 1939 autopsies were performed in the Hospital and Laboratory of the New York Zoological Park on 135 reptiles, 221 birds and 109 mammals which died in the Society's collection.

These figures do not represent the total number of deaths in the collection; they are merely the totals of specimens in each group which were subjected to post-mortem examination. Certain of the rarer mammals and birds, in particular, were deposited with the Department of Comparative Anatomy of the American Museum of Natural History without autopsy. Out of the 800 reptiles which died during the year, only a comparatively small number were examined. In the great majority of cases autolysis was advanced before the specimens reached the Laboratory.

As in the report of the Hospital and Laboratory for 1938, the titles of the International Classification of Causes of Death (human) have been employed, with such modification as was necessary to adapt them to the pathology of animals. Until a standard and generally accepted classification of the diseases of animals is compiled, a modification of the human disease list can bring at least a measure of uniformity into the reporting of animal mortality.

Joint or contributory causes of death have been ignored in the statistical summaries that follow, for the sake of brevity and clarity, and only the chief pathological changes found at autopsy have been reported. More detailed information is, of course, available on the autopsy records of the Hospital and Laboratory. These contain a description of both gross and microscopic tissue changes as well as the bacteriology and parasitology encountered at autopsy.

Grouping of specimens by age has been dropped except in the case of mammals where it was practicable to make distinctions between immature, adult and post-adult individuals. All birds and reptiles which came to autopsy were adult.

It should be stressed, in connection with Table V, that the specimens considered as "in the collection" during 1939 were, in some instances, of very brief tenure, and in many cases were never placed on exhibition. In some zoological collections it is the practice not to consider as "in the collection," for purposes of mortality statistics, specimens which failed to survive a minimum period which may range from thirty days to six months. The longer the probationary period, the lower the mortality percentage for the entire collection is likely to be. Table V includes some animals which arrived at the Zoological Park in a moribund state and failed to survive even their first day "in the collection."

TABLE I.

	Specimens.	Total specimens autopsied.	Percentage of 136 reptiles autopsied.
REPTILES.			
INFECTIOUS & PARASITIC DISEASES.....		10	7.40
<b>Acid-fast Infection</b> .....		5	3.70
<i>Iguana i. rhinolopha</i> —Central American Iguana .....	3		
<i>Python m. molurus</i> —Black-tailed Python .....	1		
<i>Agkistrodon piscivorus</i> —Moccasin .....	1		
<b>Intestinal Cestodes</b> .....		3	2.22
<i>Farancia a. abacura</i> —Red-bellied Snake.....	1		
<i>Ptyas mucosus</i> —Indian Rat Snake .....	1		
<i>Agkistrodon blomhoffi</i> —Blomhoff's Pit Viper.....	1		
<b>Intestinal Helminths</b> .....		2	1.48
<i>Eunectes murinus</i> —Anaconda .....	1		
<i>Trimeresurus flavomaculatus</i> —Indian Green Tree Viper	1		
NUTRITIONAL DISEASES .....		4	2.96
<b>Cachexia</b> .....		4	2.96
<i>Iguana i. rhinolopha</i> —Central American Iguana.....	2		
<i>Farancia a. abacura</i> —Red-bellied Snake.....	1		
<i>Vipera russelii</i> —Russell's Viper.....	1		
DISEASES OF CIRCULATORY SYSTEM.....		3	2.22
<b>Endocarditis with Ruptured Myocardium</b> .....		1	.74
<i>Lampropeltis getulus floridana</i> —Florida King Snake.....	1		
<b>Pericarditis</b> .....		1	.74
<i>Python m. molurus</i> —Black-tailed Python.....	1		
<b>Filarasis with Ruptured Myocardium</b> .....		1	.74
<i>Lampropeltis getulus</i> subsp.—Texas King Snake.....	1		
DISEASES OF RESPIRATORY SYSTEM.....		34	25.18
<b>Pneumonia</b> .....		34	25.18

Impaction of Colon with Ulceration.....	1			1	.91
<i>Didelphis virginiana</i> —Opossum .....	1				
Actinobacillosis—Oral Tissues .....		2		2	1.83
<i>Sylvicapra grimmii</i> —Gray Duiker .....		2			
Enteritis—Squill Poisoning .....			1	1	.91
<i>Koipopotamus koipopotamus kentae</i> — Gray Bush Pig .....			1		
Icterus .....		1		1	.91
<i>Lutra canadensis vaga</i> —Florida Otter.....			1		
DISEASE OF BONES & ORGANS OF LOCOMOTION.....	2			3	2.75
Paget's Disease .....			1	1	.91
<i>Papio anubis</i> —Olive Baboon.....		1			

TABLE III. (Continued)

MAMMALS.	Immature.	Adult.	Post-adult.	Total specimens autopsied.	Percentage of 109 mammals autopsied.
<b>MUSCULAR DYSTROPHY</b> .....	2			2	1.83
<i>Dendrolagus ursinus</i> —Tree Kangaroo.....	2				
<b>CONGENITAL MALFORMATION</b> .....	1			1	.91
<b>Congenital Anomaly—Legs</b> .....	1			1	.91
<i>Cervus axis</i> —Axis Deer .....	1				
<b>DISEASES OF NEW BORN</b> .....	1			1	.91
<b>Internal Hemorrhage—Umbilical Artery</b> .....	1			1	.91
<i>Lama vicugna</i> —Vicugna .....	1				
<b>SENILITY</b> .....			5	5	4.58
<b>Destroyed—Senility</b> .....			5	5	4.58
<i>Didelphis virginiana</i> —Opossum .....			1		
<i>Camelus dromedarius</i> —Dromedary .....			2		
<i>Cervus duvauceli</i> —Barasingha Deer .....			1		
<i>Cervus canadensis canadensis</i> —Elk .....			1		
<b>VIOLENT AND ACCIDENTAL DEATHS</b> .....	8	10	1	19	17.43
<b>Destroyed—Trauma</b> .....	8	10	1	19	17.43
<i>Cebus capucina</i> —White-faced Sapajou.....	1	1			
<i>Erythrocebus patas</i> —Patas Monkey.....	1				
<i>Macaca irus</i> —Java Macaque.....	1				
<i>Didelphis virginiana</i> —Opossum .....			1		
<i>Potos flavus</i> —Kinkajou .....			1		
<i>Canis latrans</i> —Coyote .....			1		
<i>Felis cacomitli</i> —Jaguarundi Cat .....			1		
<i>Felis leo</i> —Lion .....	1				
<i>Paradoxurus hemaphroditus</i> —Yellow Paradoxure .....	3				
<i>Dasypus novemcinctus texanus</i> — Nine-banded Armadillo .....			1		
<i>Dama dama</i> —Fallow Deer.....			2		
<i>Odocoileus osceola</i> — Florida White-tailed Deer .....			2		
<i>Ammotragus lervia</i> —Aoudad .....	1	1			
<b>DIAGNOSIS UNDETERMINED</b> .....	5	7		12	11.00

\* Reported in *Jour. of Parasit.*, April, 1940, Vol. 26, No. 2, page 157.

TABLE IV.

Summary of Mortality Percentage in Specimens Autopsied,  
by Disease Groups.

Disease Group	% of 135 Reptiles	% of 221 Birds	% of 109 Mammals
Gastro-intestinal .....	46.66	14.02	15.59
Respiratory .....	25.18	10.40	18.34
Nutritional .....	2.96	.90	5.50
Infectious and Parasitic.....	7.40	10.85	9.17
Trauma .....	....	16.74	17.43
All Other Causes.....	17.80	47.09	33.97

TABLE V.

Summary of Mortality for All Specimens in the Collection  
During 1939.

	Reptiles	Birds	Mammals
Specimens in Collection During 1939 <sup>1</sup> ...	1,246	2,105	621
Deaths from All Causes <sup>2</sup> .....	800	415	120
% of Mortality in Collection <sup>3</sup> .....	64.20	19.71	19.32

<sup>1</sup> These figures represent the number of specimens that came into, or remained in, the Park during 1939, and are the totals of specimens in the collection in the course of the year. Some died before being placed on exhibition.

<sup>2</sup> Includes all deaths irrespective of cause or time after arrival.

<sup>3</sup> Based on total specimens and total deaths.
